API

Widget	Request Type	Base URL	API Endpoint	Payload	Description
nudge	GET	/api/v3/app	/nudges?id=:nudge_id	-	Gets an nudge by its unique id
	GET	/api/v3/app	/nudges?limit=5&page=1	-	Gets an nudge and paginate results by page number and limit of events per page
	POST	/api/v3/app	/nudge	Event id ,Title coverImage,Icon, invitation,schedule,Description	Creates an nudget and returns the Id of the nude i.e. created Setup the cron task on that schedule
	PUT	/api/v3/app	/nudge/:id	Same as POST payload	
	DELETE	/api/v3/app	/nudge/:id	-	Deletes an nudge based on its Unique Id

When creating the cron task for nudge notification . we can use the node-schedule
https://www.npmjs.com/package/node-schedule

Cron task should be on schedule date of the nudge
